

CREATING OPPORTUNITIES FOR THE DEVELOPMENT OF PUBLIC-PRIVATE PARTNERSHIPS FOR IRRIGATION IN UZBEKISTAN

Introduction. In order to successfully apply Public-Private Partnership (PPP) in the field of water management of our country, it is necessary that not only service users are in favor of attracting a private partner, but also that both state and local authorities realize the need for cooperation with the private sector. Otherwise, it is impossible to implement some project on the basis of PPP. Because water consumers and the private sector are directly involved in the management of water infrastructure facilities. This allows management to be organized in accordance with the requirements of the site and it has a positive effect on the very efficient and economical use of water, unlike the methods of managing the water infrastructure that were previously applied uniformly for the entire region.
