
CURRENT TRENDS IN THE DEVELOPMENT OF FARMS IN INTENSIVE HORTICULTURE

Introduction. In our country in the conditions of liberalization of economy large-scale reforms in the field of intensive gardening and wine growing are undertaken.

The first group is various products of intensive gardening which are directly connected with intensive gardening; appearance of products, difference in the nature of goods; process of intensive gardens and laborconsuming harvesting; differences in maturing of fruits; All types of fruit can be stored and be processed.

The second group - the specific features connected with activity of intensive gardening farms. That is agricultural grounds and small amount of production; Production of fruit demands from the farmer of sufficient knowledge, experience and skills; far away from the market; The Possibility of cultivation of fruit in water, magnificent, mountain and foothill areas; Fertility on the basis of various agrotechnical actions; access to the field; experiments generally from generation to generation; the beginning of investments into the industry in 5-6 years; Very intensive influence of climatic conditions should be considered at intensive gardening [1].
