

ECONOMIC EFFICIENCY INDICATORS FOR THE DEVELOPMENT OF INTENSIVE GARDENING

Introduction. In fact, currently the agricultural is not gotten well efficiently without new technologies. The intensive gardens are also the most effective than traditional method. The researchers are showed that the development of intensive gardening have to be based on agricultural production and efficient use of regional characteristics. Do not forget that the production of agricultural goods is directly dependent at the climate so all processes have been required a long time, for instance farms have to spend minimum six months to get their harvest. However, each fruits have several varieties and if farms can use intensive method they will produce over the during year. These features are important to organized of product marketing processes. Today, specific farms have been established and operate in replace of liquidated collective farms.
