
EVALUATION OF PROCESSES ON THE COAST OF THE WATER RESERVOIR THROUGH SPACE SURVEY (ON THE EXAMPLE OF CHIMKURGAN RESERVOIR)

Introduction. The purpose of the construction of reservoirs in our country is one of the most important issues in the flow of rivers, the integrated use of available water resources. Therefore, the effective use of existing reservoirs, the gradual supply of water to consumers during the growing season, the establishment of the most optimal operating modes to increase the useful volume lost during operation, the development of improved methods. And most importantly, special attention is paid to high economic efficiency.
