

THEORETICAL OVERVIEW OF THE FOUNDATIONS OF DIGITAL TRANSFORMATION OF SOCIO-ECONOMIC SYSTEMS

Introduction. The digital economy is an integral part of the economy, where knowledge of subjects and intangible production dominate - the main indicator characterizing the information society. The concepts of "digital economy", "knowledge economy", "information society" and their analogues, presented in modern scientific literature, form a new socio-economic system that replaces the old industrial paradigm. In this regard, the developed countries of the world pay close attention to the harmonious development of the backbone elements of the digital economy, information society and knowledge economy. In modern market conditions, it is obvious that there is a need for systemic transformations and actions aimed at developing the digital economy in domestic socio-economic systems at all levels.
