

WAYS TO IMPROVE THE ECONOMIC EFFICIENCY OF FISH FARMING

Introduction. The dynamic development of the system of production of biological resources is the most important function of the state policy in the field of rational nature management. The transition to market relations in Uzbekistan predetermined the need to create a new economic mechanism for resource use, the development of new approaches to state regulation of the production of fish products.

The fish industry of the Republic of Uzbekistan is the most important component of the food security system of the republic.
