THE UNIQUE PLACE OF VALUES IN SPIRITUAL PROGRESS

F.Khusnitdin, PhD student TIAME National Research University

Abstract

This article shows the importance of state policy towards youth, implemented today in our country, and the importance of our original spiritual values, which were formed by our ancestors since ancient times. For the prospects of our independent country, we need highly moral and comprehensively developed people. The article analyzes the education of young people and the factors influencing them in conditions where threats and dangers to national identity and spiritual values are increasing.

Key words: Values, morality, spirituality, information attack, patriotism, democracy.

Introduction. It is difficult to imagine the national values of every nation without its history, spirituality, culture, unique customs and traditions. "When we say "value", we must understand the totality of goods and events of nature and society that serve the interests and goals of the nation, people and social groups that are important to people and humanity, valued and valued by them."

"Values are a set of people, relationships, situations, material things and spiritual wealth that have prestige, attention, respect, influence among people in society"². "Value is a component of human and social spirituality, a concept used to express the value of events, events, processes, situations, qualities, demands and procedures in the world." "Value is used to show the universal, socio-ethical, cultural and spiritual significance of certain events in reality concept" - definitions are given. This in turn shows the importance of values. National values are a form of identity associated with ethnic aspects and characteristics important to a nation. There is no nation in the world without its own values. National values turn out to be inextricably linked with the history, way of life, spirituality and culture of the nation. Recently, attention to national values has increased in Uzbekistan. This is a tribute to the Motherland, to the memory of our ancestors.

It is characterized by the priority of such characteristics as loyalty, respect for elders, respect for children, modesty, attitude. It is scientifically incorrect to understand and interpret values only as material and spiritual wealth. It is known that values are different in nature. Among them, natural, material, spiritual, socio-political, and moral values stand out. However, the highest of values is the person himself, his life, right and will, a healthy and prosperous life. The "Action Strategy" being implemented in our country is a new stage of reforms in which the population, families spiritually, socially and economically. It occupies a leading position in terms of support level. Here, based on economic and socio-political values, government officials went door to door to listen to people's pain, ease their burden, and support them financially and morally.

Materials and analysis. Although parents communicate directly and indirectly with their children and raise them meaningfully, they should first of all be role models in the interaction process, listen more to their children and try to improve their speaking skills, and then follow their own moral standards, proverbs and sayings should be used. It is very important that they explain using real-life examples. It is worth noting that you can acquire manners and skills to listen carefully and skillfully only by consolidating the knowledge of "skillfully listening." Of course, in the course of social life in the family, various incidents and events will occur, misunderstandings

between parents and children. The purest feelings, the first life ideas and ideas of a person are formed primarily in the family through the love and kind words of parents. In the family environment, spiritual criteria and views are fixed that determine the character, character and worldview of the child - the basis of such sacred concepts as goodness, nobility, kindness and honor.

Conclusion. The Constitution of the Republic of Uzbekistan is an encyclopedic document of our state. It became known that there are almost ten terms and phrases associated with protected constitutional rights. Including commitment to creative ideas, high responsibility, social justice, humanism, democratic rule of law, peace of citizens, national harmony, customs and traditions of our people, values, diversity and freedom of ideologies in public life, social justice in relations between individuals and society, peoples in the world community and sovereign equality of nations, faith of citizens, gender, race, nationality, language, religion, social origin, equality before the law regardless of personal and social status, inviolability of honor and reputation, freedom of conscience of citizens, fair labor, freedom of creativity and culture of every person.
