
WORLD EXPERIENCE AND PROBLEMS SOLVING IN LOGISTICS

Introduction. The creation of a single transport market of the Republic of Uzbekistan is one of the main tasks of the transport strategy. The geographic location of a country's transit routes is a key driver of the logistics management approach to ensure the smooth development of the national transport infrastructure. The importance of the transport system necessitates the implementation of a targeted program of economic development, the implementation of a comprehensive program aimed at the development of various modes of transport. Modern transport problems are based on a systematic approach and require special software development.
